

# **RESCHEDULED!**

## **FUELING A CLEANER ENVIRONMENT**

### **The Energy Component in Green Building Design**

An Energy Action Workshop sponsored by Laclede Gas Company

---

You are invited to join us for a **FREE** ½-day seminar to discuss how we can improve the energy efficiency and operation in commercial and industrial building applications. We will also present information on Energy Management programs and energy conservation recommendations for existing building systems.

# **Friday, May 9, 2008**

**St. Charles Conference and Convention Center**

---

**7-8 am.....Breakfast**

**8 am.....Welcome from Laclede Gas Company**

**8:15 am.....Paul Wilkinson, American Gas Association, Washington DC**  
A message from the American Gas Association supporting Green Building Design (Increasing Building Efficiencies; Recognition of Differences with Gas and Electric Applications; "De-Coupling" Rate Structures; Increase Direct Use of Natural Gas)

**8:45 am.....Neil Leslie, Gas Technology Institute, Chicago, IL**  
The Gas Technology Institute: Technical Research in Energy Efficient Product Support  
Natural Gas Industry Application Research support for Green Building Initiatives, Carbon Management Issues and Strategy.

**9:30 am.....break**

**10 am..... JoAnn Brookes and Tim Gaidis, HOK, St. Louis, MO**  
Exceptional "green" architecture is exceptionally attractive,  
Organizing the Design Process: early interface / coordination with all building disciplines,  
Integrating architectural elements/features to improve building energy performance.

**10:45 am.....Ellen Franconi, Architectural Energy Corporation, Boulder, CO**  
Integrating Energy Analysis (Modeling) into all phases of Building Design  
The Business Case for Utilizing Modeling Program Design  
Sophisticated and simplified energy modeling procedures  
Current and upcoming software tools and design evaluations of different HVAC systems)

**11:30 noon.....Anne Murphy Hill, Murphy Company, St. Louis, MO**  
Sustainable Energy Management Programs for existing buildings  
Murphy Company Energy Evaluation Program for Existing Building Applications  
Advantages for Existing Building Owners to be GREEN

**12 pm.....Lunch (provided) / networking**

---
