

# What's that **SMELL?**

If you ever notice an odor reminiscent of rotten eggs, you could be smelling natural gas.

Natural gas is actually odorless, so we mix in a very small amount of odorant compound to give it an unpleasant smell.

If you detect a gas odor, let us track it down. If the odor is strong, do not use the phone at the location (landline or cell). In addition, don't turn on or off electrical appliances or light switches and don't access a garage door opener. Leave the building immediately and, from a different location, call Missouri Natural Gas at:

<b>Farmington:</b>	573-431-2020 or 573-783-6451
<b>Festus:</b>	636-931-8383 or 877-664-2726
<b>Poplar Bluff:</b>	573-783-6451
<b>Union:</b>	636-584-8440 or 800-675-6577

*Midwest Gas Customers should call:  
636-931-5353 or 877-696-6427*
